Assembly Line Applications

COMPTEK Incorporated has addressed the computer automation needs of the industrial marketplace since 1983. We specialize in providing products and services for computer based industrial assembly, test and control systems.

COMPTEK integrates hardware and software capabilities into a cohesive efficient computer system. We provide plant floor systems for: Production monitoring and control; functional product tests; data retention and analysis; operator and management real-time displays and reports. Our experience encompasses a wide variety of applications using various computer based custom designs.

At **COMPTEK**, we take great care in the selection and configuration of the computer and peripheral equipment. We make certain that each system is customized and properly integrated to meet or exceed your specified requirements. Full installation supervision or turnkey. Training – remote or on site. Ongoing system support and service. Electrical panel and cabinet design and build.
